

Matrix College CPD Event

Depersonalisation

A workshop for therapists by Henry Adeane

Saturday 23rd February 2019

The day will include a risk escalation assessment, understanding of the Dissociative spectrum of depersonalisation, derealisation, fugue states, identity diffusion, fragmentation, psychic annihilation and psychotic breakdown.

We will spend time on exploring the development of depersonalisation spectrum disorders and integrating this into practice of working effectively and safely with clients whose minds defend against unmanageable trauma in these complex ways.

A significant amount of time will be given to attendees to present case material from their own caseloads for the group to think about.

Biography

Henry Adeane is a Psychotherapist, Trainer and Clinical Supervisor. He currently works at the Counselling Foundation in St Albans, The Bedford Prison Counselling Service, Matrix College of Counselling and Psychotherapy in Norfolk and Suffolk, The UK Council for Psychotherapy and in a number of other organisations in various capacities. He specialises in complex cases, forensic psychotherapy and the ethical treatment of addiction and personality disorder.
